Thank you for purchasing the bizstrap Responsive HTML Template. If you have questions that can't be answered by our documentation please contact us [here](#).

HTML File and Markup Structure

Framework (Twitter Bootstrap)

bizstrap is a responsive HTML template built on a 12-column grid using the Twitter Bootstrap framework. The bizstrap Template is designed to help you rapidly build a clean, responsive and highly professional business and portfolio website.

Basic Page Structure

All pages within the bizstrap template can be divided into the 3 core sections: "header", "main content", and "footer". Here's a simplified page structure of bizstrap's basic page structure:

```
<!-- Header-->
<header>
    { Top Color Stripe, Logo, Telephone, Social Icons & Navigation }
</header>

<!-- Main Content -->
<div class="main-content">
    { MAIN BODY CONTENT - EVERYTHING BETWEEN THE HEADER AND THE FOOTER }
</div>
<!-- Footer -->
<footer id="footer"></footer>
```

The Grid System

The bizstrap grid system contains 12 columns, utilizing a 940px wide container with responsive features enabled. Here are some important details about bizstrap's grid system you may want to know:

- The Main body is 940px wide
- The gutter width between columns is 20px
- Sidebars are 200px wide
- The primary content column for pages with a 3 column layout is 500px wide.
- The primary content column for pages with a 2 column layout is 720px wide.

Basic Grid HTML

For a simple two column layout, create a `.row` and add the appropriate number of `.span*` columns. As

this is a 12-column grid, each `.span*` spans a number of those 12 columns, and should always add up to 12 for each row (or the number of columns in the parent).

```
<div class="row">
    <div class="span4">...</div>
    <div class="span8">...</div>
</div>
```

In the example above we have `.span4` and `.span8` giving us 12 total columns and a complete row.

Container Class

bizstrap contains a special class that is used across all HTML files which is `.container`. This class determines the maximum width of a page and also makes sure that page is center-aligned. It also determines how pages are rendered on mobile devices and tablets.

Detailed Grid System Information

There many options available with bizstrap's Grid system, which utilized the Twitter Bootstrap Grid Framework. A detailed guide of the grid system can be found here:

<http://twitter.github.com/bootstrap/scaffolding.html>.

Header (Logo, Phone Number, Social Icons and Navigations)

bizstrap's header area contains the following elements:

- **Logo** – company/organization or product logo.
- **Phone Number** – company/organization phone number.
- **Social Icon Bar** – link to your company/organization or product social media accounts.
- **Navigation** – top horizontal multi-level navigation.

You can quickly find the header area on any bizstrap page template simply by locating the `<!-- HEADER AREA -->` comments.

Insert Your Logo into bizstrap

To insert your company logo do one of the following:

1. Replace the highlighted **logo.png** (found in the **img** folder) file with your company logo. The size of the current **logo.png** file is 236x72.

-- or--

- Point the highlighted logo to a different image file (whatever your logo file is named). Note: If you choose this option you'll need to make this change site wide (in all of your website pages).

```
<!-- HEADER AREA -->
<header>
  <div class="container">
    <div class="row">
      <!-- HEADER: LOGO AREA -->
      <div class="span4 logo">
        <a class="logo" href="index.html">
          
        </a>
      </div>
```

Phone Number

To insert your company phone number replace the highlighted number and link. Note: By putting your phone number into a link, as illustrated below, the telephone number will become an active dial link when viewed by mobile phone users.

```
<div class="span4 offset4">
<!-- HEADER: PHONE NUMBER -->
  <p class="head_phone"><a href="tel:800-655-7800">(800)655-7800</a></p>
</div>
```

Social Icons

To link your social media account to the associated social icons simply input the link in the highlighted areas below. Remove any social icons you don't wish to use by removing the associated `` line.

```
<!-- HEADER: SOCIAL ICONS -->
<ul class="socials unstyled">
  <li><a class="flickr" href="#"></a></li>
  <li><a class="twitter" href="#"></a></li>
  <li><a class="facebook" href="#"></a></li>
  <li><a class="youtube" href="#"></a></li>
  <li><a class="dribbble" href="#"></a></li>
  <li><a class="pinterest" href="#"></a></li>
</ul>
</div>
</div>
```

Site Navigation

To modify site navigation (primary horizontal site navigation) locate the `<!-- Header: PRIMARY SITE NAVIGATION -->` comment. The image below illustrates just how bizstrap's navigation classes work, and how you to need configure navigation for your website.

```

<!-- HEADER: PRIMARY SITE NAVIGATION -->
<div class="container">
  <div class="navbar">
    <div class="navbar-inner">
      <div class="container">
        <div class="buttons-container">
        </div>
        <div class="nav-collapse">
          <ul class="nav nav-pills">
            <li class="active single"><a href="index.html">HOME<i>home</i></a>
            </li>
          </ul>
        </div>
      </div>
    </div>
  </div>
</div>

<li class="dropdown">
  <a class="dropdown-toggle" data-toggle="dropdown" href="#menu1">FEATURES<i>awesome features</i></a>
  <ul class="dropdown-menu">
    <li><a href="columns.html">Columns</a></li>
    <li><a href="dividers.html">Dividers</a></li>
    <li><a href="frames.html">Frames</a></li>
    <li><a href="google_maps.html">Google Maps</a></li>
    <li><a href="icons_and_buttons.html">Icons and Buttons</a></li>
    <li><a href="lists.html">Lists</a></li>
    <li><a href="message_boxes.html">Message Boxes</a></li>
    <li><a href="navigation.html">Navigation</a></li>
    <li><a href="price_tables.html">Price Tables</a></li>
    <li><a href="quotes.html">Quotes</a></li>
    <li><a href="sliders_and_videos.html">Sliders and Videos</a></li>
    <li><a href="tables.html">Tables</a></li>
    <li><a href="tabs_and_collapses.html">Tabs and Collapses</a></li>
    <li><a href="typography.html">Typography</a></li>
  </ul>
</li>

```

Dropdown menu items and links

Twitter Bar

bizstrap includes a custom twitter bar that cycles tweets from a selected Twitter account.

How to insert the Twitter Bar into a web page

The Twitter bar is already included all bizstrap page templates. However, you use the following markup to insert the Twitter Bar in any page you create from scratch:

```

<div class="recent-tweets">
  <div class='container'>
    <div class="row show-grid">
      <div class="span12 twitter-wrapper">
        <div id="nav_t"></div>
        <div class="tweets-slide"><ul class="slides"></ul></div>
        <a class="follow_img" href="#"></a>
      </div>
    </div>
  </div>
</div>

```

Also, the following markup line should be included somewhere in the page body, preferably just below the footer:

```
<script type="text/javascript" src="js/custom.js"></script>
```

How to configure the Twitter Feed

To configure your Twitter Bar with a selected Twitter account simply open the “custom.js” file found in the “js” folder; and find the text “**screen_name:**”; and change the name currently in single quote to the Twitter screen name you wish to use.

```

// twitter feed
$cjq.ajax({
  url: 'http://api.twitter.com/1/statuses/user_timeline.json',
  type: 'GET',
  dataType: 'jsonp',
  data: {
    screen_name: 'gigaom', red box
    include_rts: true,
    count: 5,
    include_entities: true
  },
  success: function(data, textStatus, xhr) {
    var html = '';
    for (var i = 0; i < data.length; i++) {
      html = html + '<li class="latest-tweet"><p>' + data[i].text + '</p></li>';
    }
    $cjq(".tweets-slide ul").append($cjq(html));
    var height_li = 0;
    $cjq(".tweets-slide ul li").each(function() {
      $cjq(this).css('height', '');
      if ($cjq(this).height() > height_li) height_li = $cjq(this).height();
    });
  }
});

```

Footer (Footer Logo/Address, About Us, and Navigation Links)

bizstrap contains a custom footer that includes 3 columns:

- **(Column 1) Company Info** – includes area for company logo and company address.
- **(Column 2) About Us** – “about us” text area.

- **(Column 3) Navigation** - includes navigation links.

Modify the Footer Logo and Address

To modify the footer logo and footer address simply locate the `<!-- FOOTER: LOGO -->` and `<!-- FOOTER: ADDRESS -->` comment in the footer area of the page change the highlighted areas.

```
<!-- FOOTER: LOGO -->
    <div class="row flex-grid">
        <div class="span4">
            
<!-- FOOTER: ADDRESS -->
        <address class="address">
            <p><i class="icon-map-marker icon-large"></i>1800 North Central Expressway</p>
            <p><i>&ampnbsp</i>Suite 800</p>
            <p><i>&ampnbsp</i>Dallas, Texas 75231</p>
            <p><i class="icon-phone icon-large"></i>Phone: (800) 655-7803</p>
            <p><i class="icon-print icon-large"></i>Fax: (800) 655-7800</p>
        </address>
    </div>
```

Modify the Footer About Us Text

To modify the footer About Us text simply locate the `<!-- FOOTER: ABOUT US -->` comment in the footer area of the page and change the highlighted areas below.

```
<!-- FOOTER: ABOUT US -->
    <div class="span4 footer-center">
        <h4 class="center-title">About Us</h4>
        <p>Lorem ipsum dolor sit amet, consectetur adipiscing elit...</p>
        <p>Lorem ipsum dolor sit amet, consectetur adipiscing elit...</p>
    </div>
```

Modify the Footer Navigation Links

To modify the footer Navigation links simply locate the `<!-- FOOTER: NAVIGATION LINKS -->` comment in the footer area of the page and change the highlighted areas below.

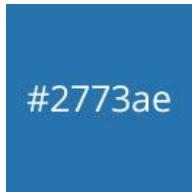

```

<!-- FOOTER: NAVIGATION LINKS -->
<div class='span4 footer-right'>
  <h4 class='center-title'>Navigate</h4>
  <ul class='footer-navigate'>
    <li>
      <a href='''>Home</a>
    </li>
    <li>
      <a href='''>Features</a>
    </li>
    <li>
      <a href='''>Pages</a>
    </li>
    <li>
      <a href='''>Portfolio</a>
    </li>
    <li>
      <a href='''>Blog</a>
    </li>
    <li>
      <a href='''>Contact</a>
    </li>
  </ul>
</div>

```

How to Change the Template Color Scheme

The default primary template color for bizstrap is #2773ae.

To change this primary template color or any other color in the template scheme simply open the “color_scheme.css” file in the “css” folder; and perform a **Find and Replace** inputting #2773ae in the **“Find”** field and color value you wish to change it to in the **“Replace”** field. Other colors within the template scheme are documented inside the “color_scheme.css” file using comments.

Working with bizstrap Pages and Page Templates

bizstrap contains several page templates to help you rapidly build web pages with your own customized content. This section lists and details those templates (see below).

Home Page Template

bizstrap’s Home Page template contains quite a few element blocks, and you may not wish to use them

all. Most, if not all, of these element blocks are highly effective and can also be used or repurposed for other pages within your website. Thus, we detail each element block within the Home Page below>

Home: Slider

Here are a few general things you'll want to know about the slide in the bizstrap home page template:

- The Home page template uses the popular Slider Revolution. A developer license was obtained ThemeLeaf for the bizstrap HTML Template; and your purchase of bizstrap gives you a user license for Slider Revolution, a \$12 value.
- Slide within the home page template and demo site are 940x400 pixels.
- The slider held within the following div container: `<div class="bannercontainer">`.

About Slider Revolution

Turn simple HTML markup into a responsive (mobile friendly) or full width slider with must-see-effects and meanwhile keep or build your SEO optimization (all content always readable for search engines). See the heaps of custom transitions/animations for each object on the page! Customize this slider with just a little HTML and CSS to your very needs.

This plugin features tons of unique transition effects, an image preloader, video embedding, autoplay that stops on user interaction and lots of easy to set options to create your own effects. All customization can be handled via jQuery Options, HTML 5 data-attributes and CSS !

The developer site for Slider Revolution can be found here:

http://codecanyon.net/item/slider-revolution-responsive-jquery-plugin/2580848?sso?WT.ac=search_item&WT.seg_1=search_item&WT.z_author=themepunch

Also, you can find other slide examples/variations using Slider Revolution here:

<http://www.youtube.com/watch?v=J9FroPmOLTo>

Slider Revolution Markup (documentation from the developer)

The items markup uses javascript/jQuery to transform a block of HTML markup into the slider, all customization is done through the use of HTML5 data attributes and CSS. The markup is valid for HTML5 rules and the content will be fully indexed by search engines. The general structure of markup follows this schema:

Two surrounding DIVs are the basic holder for your Slider:

```
<div id="banner_container">  
  <div id="banner" >...</div>
```

```
</div>
```

```
<!-- MAIN CONTENT AREA -->
<div class="main-content">
<div class="container">
<!-- MAIN CONTENT AREA: SLIDER BANNER (REVOLUTION SLIDER) -->
<div class="bannercontainer">
<div class="banner">
<ul>
<!-- MAIN CONTENT AREA: SLIDER BANNER (REVOLUTION SLIDER) - SLIDE 1 [SLIDE STYLE=BOXFADE] -->
<li class="slide1" data-transition="boxfade" data-slotamount="5" data-masterspeed="300">

<div class="caption sft carousel-caption" data-x="110" data-y="110" data-speed="1000" data-start="1000" data-easing="easeInBack" style="background: none;">
<p class="middle">Beautiful, clean, ultra-responsive & highly flexible</p>
</div>
<div class="caption sfl carousel-caption" data-x="98" data-y="141" data-speed="1000" data-start="1000" data-easing="easeOutBack" style="background: none;">
<p class="big">An Incredible New</p>
</div>
<div class="caption sfl carousel-caption" data-x="98" data-y="191" data-speed="1000" data-start="1000" data-easing="easeOutBack" style="background: none;">
<p class="big">HTML5 Template!</p>
</div>
<div class="caption sfb carousel-caption" data-x="111" data-y="247" data-speed="1000" data-start="1000" data-easing="easeInBack" style="background: none; width: 436px;">
<p class="small">Bring your website into the 21st century with reDesign. Beautiful, clean, ultra-responsive and highly flexible reDesign puts you firmly in control of your new site build or site re-design.</p>
</div>
</li>
```

An unordered list inside holds the different slides as list elements

```
<ul>

<!-- THE BOXSLIDE EFFECT EXAMPLES WITH LINK ON THE MAIN SLIDE EXAMPLE -->

<li data-transition="boxslide" data-slotamount="7" data-link="http://www.google.de">

<div class="caption sft big_white" data-x="400" data-y="100" data-speed="700" data-start="1700" data-easing="easeOutBack">KICKSTART YOUR WEBSITE</div>
<div class="caption sfb big_orange" data-x="400" data-y="142" data-speed="500" data-start="1900" data-easing="easeOutBack">WITH SLIDER REVOLUTION!</div>
<div class="caption lfr medium_grey" data-x="510" data-y="210" data-speed="300" data-start="2000">UNLIMITED TRANSITIONS</div>
</li>
...
</ul>
```

Next, we describe the inner of this list elements.

The more advanced users will have no problems in customizing the slider up to every detail and create their own sliders using the CSS files.

The CSS file responsible for the layout of your slider is the settings.css. Find All Responsive Settings and Docu later in "Responsive Captions".

Layout

The Default parameters of the Plugin

- **delay** The time one slide stays on the screen in Milliseconds (Default: 9000)
- **startheight** Basic Height of the Slider in the desktop resolution in pixel, other screen sizes will be calculated from this (Default: 490) It should be similar to the settings of the style sheet. If you use a full width banner, it will define the max. Height of the banner by resizing of the browser. The banner won't be higher than this value.
- **startwidth** Basic Width of the Slider in the desktop resolution in pixel, other screen sizes will be calculated from this (Default: 890) It should be similar to the settings of the style sheet. If you use a full width banner, it will define the max. Width of the banner by resizing of the browser.
- **hideThumbs** Time after that the Thumbs will be hidden(Default: 200),
- **navigationType** Display type of the navigation bar (Default:"none")
Options:
bullet
thumb ** In full width version thumbs won't be displayed if navigation offset set to show thumbs outside of the container ! Thumbs must be shown in the container!
none
both
- **navigationArrows** Display position of the Navigation Arrows (Default: "nexttobullets")
Options:
nexttobullets
verticalcentered ** By navigation Type Thumb arrows always centered or none visible
none
- **navigationStyle** Look of the navigation bullets (Default: "round")
Options:
round
square
navbar ** If you choose navbar, we recommend to choose Navigation Arrows to nexttobullets

- **touchenabled** Enable Swipe Function on touch devices (Default: "on")

Options:

on

off
- **navOffsetHorizontal** The Bar is centered but could be moved this pixel count left(e.g. -10) or right (Default: 0) ** By resizing the banner, it will be always centered !!
- **navOffsetVertical** The Bar is bound to the bottom but could be moved this pixel count up (e. g. -20) or down (Default: 20)
- **shadow** The Shadow display underneath the banner

Options:

0 No Shadow

1

2

3
- **onHoverStop** Stop the Timer when hovering the slider

Options:

on

off
- **thumbWidth** the basic Width of one Thumbnail (only if thumb is selected. Default:100)
- **thumbHeight** the basic Height of one Thumbnail (only if thumb is selected Default 50)
- **thumbAmount** the amount of the Thumbs visible same time (only if thumb is selected)

** All Thumbs will be hidden in smallest Responsive Level, and in smaller level default size is reseted to 60x30px. Can be modifivated in the settings.css file)
- **fullWidth** on/off It turns on the Horizontal Centering of Images in FullWidth version. In Case the Image is bigger then the container width, it fits the image with its height in the container and centers horizontally.
- **stopAtSlide** -1 or 1 to 999. Stop at selected Slide Number. If set to -1 it will loop without stopping.
Only available if stopAfterLoops is not equal -1 !
- **stopAfterLoops** -1 or 0 to 999. Stop at selected Slide Number (stopAtSlide) after slide looped "x" time, where x this Number. If set to -1 it will loop without stopping. Only available if stopAtSlide not equal -1 !

02 Slider items

**** - Every list item represents a new banner/slider item.
Transition effects and a possible slide link are defined here:

- **data-transition** The appearance transition of this slide
 Options:
 boxslide
 boxfade
 slotzoom-horizontal
 slotslide-horizontal
 slotfade-horizontal
 slotzoom-vertical
 slotslide-vertical
 slotfade-vertical
 curtain-1
 curtain-2
 curtain-3
 slideleft
 slideright
 slideup
 slidedown
 fade
 random
 slidehorizontal
 slidevertical
- **data-masterspeed** Set the Speed of the Slide Transition. Default 300, min:100 max:2000.
- **data-slotamount** The number of slots or boxes the slide is divided into. If you use boxfade, over 7 slots can be juggy.
- **data-link** A link on the whole slide pic
- **data-delay** A new Dealy value for the Slide. If no delay defined per slide, the dealy defined via Options will be used
- **data-thumb** An Alternative Source for thumbs. If not defined a copy of the background image will be used in resized form

Each List item must include:

- an image as Background Image / Main Image with Data of the thumb
 OR
 ▪ a colored background image AND a coloredbg caption which is full width/height defined !!
 ▪ [``](#)

- <div class="caption coloredbg fade" data-x="0" data-y="0" data-speed="10" data-start="0" style="background-color:#ff9118; width:100%;height:100%"></div>

Each List item can include:

- some <div>s containing captions (class="caption"), this could contain embedded video iframes also

```
<li data-transition="boxslide" data-slotamount="7" data-link="http://www.google.de">

<div class="caption sft big_white" data-x="400" data-y="100" data-speed="700" data-start="1700" data-easing="easeOutBack">KICKSTART YOUR WEBSITE</div>
<div class="caption sfb big_orange" data-x="400" data-y="142" data-speed="500" data-start="1900" data-easing="easeOutBack">WITH SLIDER REVOLUTION!</div>
<div class="caption lfr medium_grey" data-x="510" data-y="210" data-speed="300" data-start="2000">UNLIMITED TRANSITIONS</div>
</li>
```

Captions

Captions are Containers which can be customized via CSS, classes for the start animation and some data options.

The CSS for the caption added in the settings.css file because it depends strongly on the responsive Sizing.

There are 4 Steps of Responsive Contents which are written later below under the Responsive Dependencies Caption.

You find an example in the settings.css of our item download.

The options are in detail:

- color **class** example big_white, big_orange, medium_grey (check the style.css of the example for details)
- animation **class**

Options:

sft - Short from Top
 sfb - Short from Bottom
 sfr - Short from Right
 sfl - Short from Left
 lft - Long from Top
 lfb - Long from Bottom

Ifr - Long from Right

Ifl - Long from Left

fade - fading

- **data-x** The horizontal position in the standard (via startwidth option defined) screen size (other screen sizes will be calculated)
- **data-y** vertical position in the standard (via startheight option defined) screen size (other screen sizes will be calculated)
- **data-speed** duration of the animation in milliseconds
- **data-start after** how many milliseconds should this caption start to show
- **data-easing** special easing effect of the animation

Options:

easeOutBack

easeInQuad

easeOutQuad

easeInOutQuad

easeInCubic

easeOutCubic

easeInOutCubic

easeInQuart

easeOutQuart

easeInOutQuart

easeInQuint

easeOutQuint

easeInOutQuint

easeInSine

easeOutSine

easeInOutSine

easeInExpo

easeOutExpo

easeInElastic

easeOutElastic

easeInOutElastic

```
easeInBack  
easeOutBack  
easeInOutBack  
easeInBounce  
easeOutBounce  
easeInOutBounce
```

Videos

In order to embed videos in the slider you can embed videos via iframe of your favorite video site that allows this kind of embedding. An example with Vimeo:

```
<li data-transition="slideup" data-slotamount="20">  
  
    <div class="caption lfb boxshadow" data-x="70" data-y="120" data-speed="900" data-  
    start="500" data-easing="easeOutBack"><iframe  
    src="http://player.vimeo.com/video/29298709?title=0&byline=0&portrait=0" width="460"  
    height="259"></iframe></div>  
  
    <div class="caption lfb medium_grey" data-x="550" data-y="258" data-speed="300"  
    data-start="1600" data-easing="easeOutExpo">to your Slides</div>  
  
</li>
```

Banner Timer

In order to use a banner timer, you will need to add the markup within the banner or fullwidthbanner divs.

The markup should look like :

```
<div class="tp-bannertimer"></div>
```

To remove this timer just simple remove the markup from the container, and that is it.

Home Page Template: Hero Block 1

The Home Page template includes a special stylized text block called **Hero Block 1**. Below is an illustration of the Hero Block 1 on the home page of the bizstrap demo website:

The screenshot shows the homepage of the bizstrap demo website. At the top, there is a large hero section with the text "An Incredible New HTML5 Template!" and a subtext about bringing the website into the 21st century. To the right of this is a photo of a smiling woman with her hand to her chin. Below the hero section is a red arrow pointing to a call-to-action box labeled "Say hello to bizstrap!". This box contains the text "Clean, modern & ultra-responsive" and a paragraph about bizstrap's design and features. To the right of this box is another box titled "Effective Action Boxes That Get Results" with text about utilizing effective calls to action and a "Buy it now just for \$18" button. At the bottom of the page are four circular icons with text: "Clean Design" (ruler icon), "Flexible Layout" (grid icon), "Quick Shortcuts" (arrow icon), and "Responsive" (double arrow icon).

To modify the content of the Hero Block 1 element simply locate the `<!-- MAIN CONTENT AREA: BIZSTRAP CUSTOM – HERO BLOCK 1 (TEXT BLOCK) -->` comment and modify the highlighted areas in markup illustration shown below.

```
<!-- MAIN CONTENT AREA: [REDACTED] CUSTOM - HERO BLOCK 1 (TEXT BLOCK) -->
<div class="span6 home-block hero-block-1">
    <h1>Say hello to [REDACTED]</h1>
    <h2>Clean, modern & ultra-responsive</h2>
    <p>reDesign is a clean, modern and...</p>
</div>
```

You can also insert the same element on other web pages using the markup shown in the illustration above.

Home Page Template: Hero Block 2

The Home Page template includes a special stylized “call-to-action” unit called **Hero Block 2**. Below is an illustration of the Hero Block 2 element on the home page of the bizstrap demo website:

Say hello to bizstrap!

About Us (Both Sidebars) Page Template

Note: The About Us (Both Sidebars) Page Template is an example of an “About Us” web page, but can be used for any web page that you wish to create while containing both right and left sidebars and a center-column main or primary content body.

The About US (Both Sidebars) page is a template that contains both a left-side and right-side sidebar. In the template, the left-side sidebar contains sub-navigation and a left-side “sticky note”; while the right-side sidebar contains a right-side sticky note, text widget content area, tags widget content area and a gallery widget content area.

Outside of the Header and Footer the primary part of this page template you'll be concerned with is the “Main Content Area” which is commented in the page's code as such.

```
</header>
<!-- MAIN CONTENT AREA --> 
<div class="main-content">
    <div class="container">
        <div class="row show-grid">
            <div class="span12">
<!-- BREADCRUMBS -->
    <div id="breadcrumb">
        <ul>
            <li class="home"><a href="#">Home</a></li>
            <li><a href="#">Pages</a></li>
            <li><a href="">About Us (Both Sidebars)</a></li>
        </ul>
    </div>
```

The primary components/parts of the “Main Content Area” are listed and commented in the page source as:

- **Breadcrumbs <!-- BREADCRUMBS -->**

This is the area you'll refer to in order to change content in the Breadcrumb Navigation.

Breadcrumbs provide links back to each previous page the user navigated through to get to the current page.

- **Left Sidebar <!-- BEGIN LEFT-SIDEBAR -->**

This is the area you'll refer to in order to change content in the Left Sidebar.

- **Article Area (middle column or primary content area) <!-- BEGIN ARTICLE CONTENT AREA -->**

This is area you'll refer to in order to change content in the middle column (primary content area).

- **Right Sidebar <!-- BEGIN RIGHT-SIDEBAR -->**

This is the area you'll refer to in order to change content in the Right Sidebar.

FAQs Page Template

The screenshot shows a website layout for a 'FAQs Page Template'. On the left, there is a sidebar with a navigation menu under 'Pages' containing links to 'About Us (both sidebars)', 'About Us (left sidebar)', 'About Us (right sidebar)', 'Gallery', 'Our Team', 'Our Team (Large blocks)', 'Philosophy', and 'FAQs'. The main content area has a title 'Frequently Asked Questions'. It contains three sections: 'FAQ Group 1' with three questions, 'FAQ Group 2' with one question, and 'FAQ Group 3' with one question. Each section has a collapsed accordion panel with a plus sign icon and a expanded panel with a minus sign icon. The expanded panels contain placeholder text in Latin.

```
<div class="span9 main-column two-columns-left">
    <h1>Frequently Asked Questions</h1>
    <h2>FAQ Group 1</h2>
    <div id="accordion2" class="accordion">
        <div class="accordion-group">
            <div class="accordion-heading">
                <a href="#collapseOne" data-parent="#accordion2" data-toggle="collapse" class="accordion-toggle collapsed">What services do you provide?</a>
            </div>
            <div class="accordion-body collapse" id="collapseOne" style="height: 0px;">
                <div class="accordion-inner">
                    Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut non libero magna. Sed et quam lacus. Fusce condimentum eleifend enim a feugiat. Pellentesque viverra vehicula sem ut volutpat. Integer sed arcu massa. Sed et quam lacus. Fusce condimentum eleifend enim a feugiat. Pellentesque viverra vehicula sem ut volutpat.
                </div>
            </div>
        </div>
        <div class="accordion-group">
            <div class="accordion-heading">
                <a href="#collapseTwo" data-parent="#accordion2" data-toggle="collapse" class="accordion-toggle collapsed">What aftersales support do you offer?</a>
            </div>
            ....
        </div>
    </div>

```

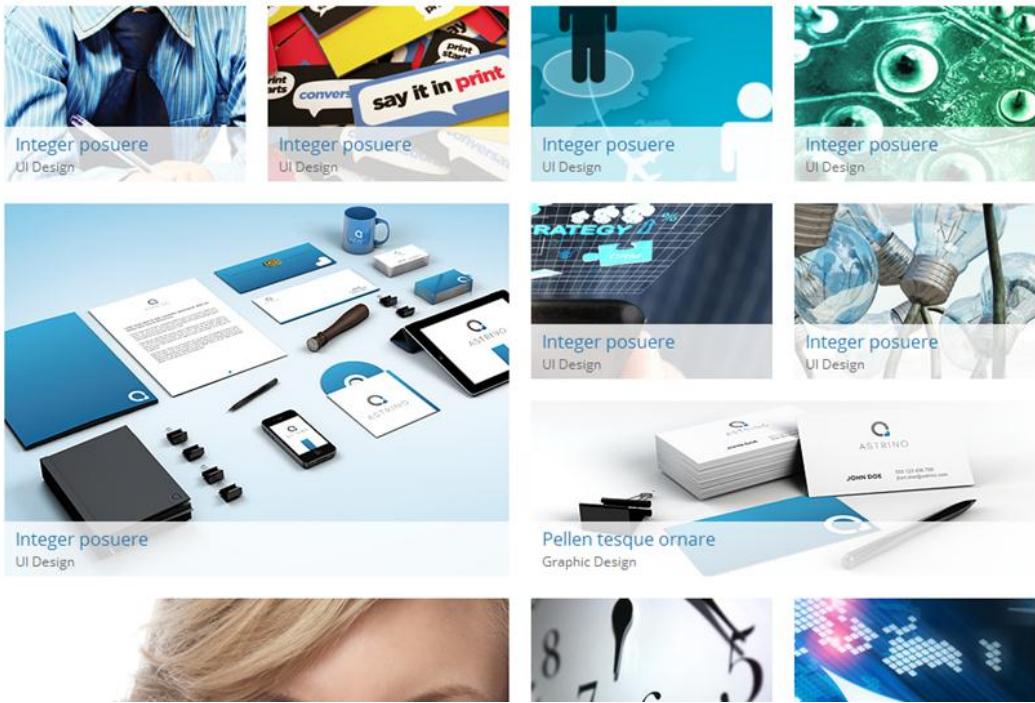

Portfolio (Masonry Style) Page Template

bizstrap includes two different layouts portfolio in which to choose from: a masonry-style portfolio and a basic square grid portfolio. Below we discuss defining/configuring the masonry-style portfolio.

Home > Portfolio > Portfolio

Our Work

All Web Print Photo Video

Defining Portfolio Filters

To modify/add portfolio filters in the portfolio (masonry-style grid) page template modify the highlighted areas shown in the markup example below to fit your specific needs.

```

<!-- START PORTFOLIO NAV -->
    <div class="portfolio-nav">
<!-- SET PORTFOLIO NAV FILTERS HERE -->
    <ul id="filters" data-option-key="filter" class="nav nav-pills nav-pills-portfolio">
        <li class="active"><a href="#" data-toggle="pill" data-filter="*">All</a></li>
        <li><a href="#" data-toggle="pill" data-filter=".web">Web</a></li>
        <li><a href="#" data-toggle="pill" data-filter=".print">Print</a></li>
        <li><a href="#" data-toggle="pill" data-filter=".photo">Photo</a></li>
        <li><a href="#" data-toggle="pill" data-filter=".video">Video</a></li>
    </ul>
<!-- SET PORTFOLIO NAV SWITCHES -->
    <ul class="portfolio-switch">
        <li class="collapsed"><a class="active" href="portfolio.html"></a></li>
        <li class="simple"><a href="portfolio_grid.html"></a></li>
    </ul>
</div>
<!-- END PORTFOLIO NAV -->

```

Configuring the Switch Between Portfolio Grids

The markup below enables/defines switch between portfolio grid types, which allows you to use both type of portfolio grid should you choose to do so.

```

<!-- SET PORTFOLIO NAV SWITCHES -->
    <ul class="portfolio-switch">
        <li class="collapsed"><a href="portfolio.html"></a></li>
        <li class="simple"><a class="active" href="portfolio_grid.html"></a></li>
    </ul>

```

Defining Portfolio Grid Items

To modify/add portfolio grid items in the portfolio (masonry-style grid) page template modify the highlighted areas shown in the markup example below.

```

<!-- PORTFOLIO ITEM 1 -->
    <div id="portfolio" class="row show-grid">
        <div class="span3 small hp-wrapper element web">
            <a href="#">
            </a>
            <a href="#" class="top-link"><img style="width: 220px; height: 160px;" src=

Annotations for the code:

- Links to Portfolio Item Page: Points to the href="#" in the first  tag of the first item's bottom-block.
- Portfolio Image: Points to the  in the first item's top-link.
- Filter Category: Points to the href="#" in the first  tag of the first item's bottom-block.
- Portfolio Item Text: Points to the UI Design text in the first item's bottom-block.

```

Portfolio Grid Page Template

bizstrap includes two different layouts portfolio in which to choose from: a masonry-style portfolio (discussed in the topic above) and a basic square grid portfolio. Below we discuss defining/configuring the basic square grid portfolio.

The screenshot displays a portfolio grid page with a header navigation bar containing 'Home', 'Portfolio', and 'Portfolio Grid'. Below the header, the title 'Our Work' is centered. A filter menu at the top left includes 'All' (selected), 'Web', 'Print', 'Photo', and 'Video'. To the right of the filter are two grid icon buttons. The main content area features a 4x3 grid of 12 project cards. Each card has a small thumbnail image at the top, followed by the project title 'Integer posuere' and the category 'UI Design' at the bottom. The cards are arranged in four rows and three columns. The first row contains three cards: a blue-toned photo of a person's hands, a collage of colorful print-related images, and a graphic of a hand pointing at a map. The second row contains three cards: a dark-themed graphic with the word 'STRATEGY', a collage of lightbulbs, and a graphic of a hand holding a pen over large numbers. The third row contains three cards: a blue-toned photo of a person's hands, a collage of colorful print-related images, and a graphic of a hand pointing at a map. The fourth row contains one card, which is partially visible on the left side of the grid.

Defining Portfolio Filters

To modify/add portfolio filters in the portfolio grid page template modify the highlighted areas shown in the markup example below to fit your specific needs.

```

<!-- START PORTFOLIO NAV -->
    <div class="portfolio-nav">
        <!-- SET PORTFOLIO NAV FILTERS HERE -->
        <ul id="filters" data-option-key="filter" class="nav nav-pills nav-pills-portfolio">
            <li class="active"><a href="#" data-toggle="pill" data-filter="*">All</a></li>
            <li><a href="#" data-toggle="pill" data-filter=".web">Web</a></li>
            <li><a href="#" data-toggle="pill" data-filter=".print">Print</a></li>
            <li><a href="#" data-toggle="pill" data-filter=".photo">Photo</a></li>
            <li><a href="#" data-toggle="pill" data-filter=".video">Video</a></li>
        </ul>
        <!-- SET PORTFOLIO NAV SWITCHES -->
        <ul class="portfolio-switch">
            <li class="collapsed"><a class="active" href="portfolio.html"></a></li>
            <li class="simple"><a href="portfolio_grid.html"></a></li>
        </ul>
    </div>
<!-- END PORTFOLIO NAV -->

```

Defining Portfolio Grid Items

To modify/add portfolio grid items in the portfolio (basic square grid) page template modify the highlighted areas shown in the markup example below.

```

<!-- PORTFOLIO ITEM 1 -->
Links to Portfolio Item Page <li class="span3 small hp-wrapper web">

    <a href="#">
    </a>
    <a href="#" class="top-link"><img style="width: 220px; height: 160px;" src=
    "img/item_220-160_01.jpg">
    </a>
    <div class="bottom-block">
        <a href="#">Integer posuere</a>
        <p>UI Design</p>
    </div>
</li>

```

Portfolio Item Page Template

The Portfolio Item Page Template is designed to allow you to create pages for showcasing your work projects. The Portfolio Item Page Template contains three primary content areas:

- Portfolio Item Description
- Portfolio Item Detail List
- Portfolio Carousel Slider

Each content area is highlighted in illustration below...

Portfolio Item Description

Portfolio Item Detail List

Portfolio Item

PORTFOLIO CAROUSEL SLIDER

Portfolio Item Description

To edit/modify the portfolio item description refer to the <!-- PORTFOLIO ITEM DESCRIPTION --> comments section in the page's markup as shown below.

```
<!-- PORTFOLIO ITEM DESCRIPTION -->
    <div class="span8">
        <h1>Portfolio Item</h1>
        <p>Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean vehicula vulputate condimentum. Vivamus dapibus enim a felis semper iaculis. Nulla eu turpis purus. Morbi at neque in sapien molestie rutrum.</p>

        <h3 class="text-info">Skills used to complete the projects</h3>

        <ul class="icons">
            <li><i class="icon-ok"></i> Graphic Design</li>
            <li><i class="icon-ok"></i> Branding</li>
            <li><i class="icon-ok"></i> Identity</li>
            <li><i class="icon-ok"></i> Business Strategy</li>
            <li><i class="icon-ok"></i> Product Management</li>
        </ul>

        <p>Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean vehicula vulputate condimentum. Vivamus dapibus enim a felis semper iaculis. Nulla eu turpis purus. Morbi at neque in sapien molestie rutrum.</p>

        <p>Mauris libero neque, pulvinar non fringilla quis, pellentesque a nisl. Aliquam a ipsum a ligula blandit sollicitudin sit amet eu sem. Quisque consequat condimentum magna, sed porta lorem interdum et. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean vehicula vulputate condimentum.</p>
    </div>
    <div class="span1"></div>
```

Portfolio Item Detail List

To edit/modify the portfolio item detail list refer to the <!-- PORTFOLIO ITEM DETAIL LIST --> comments section in the page's markup as shown below.

```
<!-- PORTFOLIO ITEM DETAIL LIST -->
    <div class="span3 portfolio-details">
        <a href="portfolio.html"><button class="btn btn-primary" type="button"><i class="icon-circle-arrow-left"></i> Back to Portfolio</button></a>
        <br />
        <br />
        <ul class="item-details">
            <li>
                <span class="title">Client:</span>ThemeLeaf</li>
            <li>
                <span class="title">Date:</span>August 2012</li>
            <li class="website">
                <a href="#"><i class="icon-link"></i>Website</a>
            </li>
            <li class="tags">
                <p><i class="icon-tags icon-large"></i>Print, Logo, Identity</p>
            </li>
            <li class="share">
                <span>Share:</span>
                <!-- AddThis Button BEGIN -->
                <div class="addthis_toolbox addthis_default_style ">
                    <a class="addthis_button_preferred_1"></a>
                    <a class="addthis_button_preferred_2"></a>
                    <a class="addthis_button_preferred_3"></a>
                    <a class="addthis_button_preferred_4"></a>
                    <a class="addthis_button_compact"></a>
                    <a class="addthis_counter addthis_bubble_style"></a>
                </div>
            </li>
        </ul>
    </div>
```

Portfolio Carousel Slider

To edit/modify the portfolio carousel slider refer to the <!-- PORTFOLIO CAROUSEL SLIDER --> comments section in the page's markup as shown below.

```
<!-- START PORTFOLIO CAROUSEL SLIDER -->
<div class="portfolio-slider">
    <div id="carousel" class="flexslider">
<!-- START PORTFOLIO SLIDE THUMBNAILS -->
    <ul class="slides">
<!-- IMAGE 1 -->
        <li>
            
        </li>

Other bizstrap Page Template

There are several other Page Templates included in the bizstrap HTML Template download. Editing these pages is identical to editing the page templates listed above. Thus, refer to the page template above that most resembles the page template below you wish to use.

Other page templates:

- Blog (both sidebars) Page Template
- Blog (left sidebar) Page Template
- Blog (right sidebar) Page Template
- Post (both sidebars) Page Template
- Post (left sidebar) Page Template
- Post (right sidebar) Page Template

Features: CSS Style Shortcuts and Components

Below is a condensed list of CSS style shortcuts and components available for the bizstrap HTML Responsive Site Template. bizstrap is built on the Twitter Bootstrap Framework. If you wish to explore additional features that may not be shown here, please refer to the Twitter Bootstrap website, which contains extensive documentation [at http://twitter.github.com/bootstrap/](http://twitter.github.com/bootstrap/).

Standard Bootstrap Elements

Some of CSS style shortcuts and components demonstrated in the bizstrap demo file are custom made to fit the specific design of the bizstrap theme. However, most of the great CSS style shortcuts and

components we've demonstrated in the bizstrap theme are standard elements built within the Twitter Bootstrap Framework and are available for you add into your web pages. Because Twitter Bootstrap does a great job at documenting these elements please refer to the official Twitter Bootstrap website at <http://twitter.github.com/bootstrap/index.html>.

You may also find the page source our demo files helpful. Below is a list of the those pages which we've included in your purchase:

- **Columns** - columns.html.
- **Buttons** - icons_and_buttons.html.
- **Lists** - lists.html.
- **Message Boxes** - message_boxes.html.
- **Navigation** – lists.html.
- **Tables** - tables.html.
- **Typography** - typography.html.
- **Tabs and Collapses** - tabs_and_collapses.html.

There are also several other shortcut elements available for from Twitter Bootstrap that we do not list below. Please refer to the Twitter Bootstrap website for a full list.

You may also search YouTube and Google for Twitter Bootstrap Lessons, Tutorials, Tips, Tricks, etc. for additional resources.

Custom bizstrap Feature Elements

The bizstrap HTML template includes several custom feature elements

- Stickies
- Price Tables
- Line Dividers
- Image Frames
- Google Maps
- Sliders and Videos

Sticky Notes

Sticky Notes are highly visible notes designed to catch the attention of website visitors. Below is a list of sticky note colors and their associated class:

- White (note-stick)
- Red (alert-stick)
- Green (success-stick)
- Blue (info-stick)

- Yellow (attention-stick)

The basic sticky note

To insert a basic sticky note use the following markup:

```
<div class="span3 note-stick stick">
  <h2>Sticky Note Headline</h2>
  <p>Body text for sticky notes.</p>
</div>
```

To float sticky notes right or left use the following markup...

bizstrap includes a special class for floating sticky notes right or left. To float sticky notes right or left use the following markup:

Float Right:

```
<div class="span3 alert-stick stick left-stick">
  <h1>Float Me Left</h1>
  <h2>Yep, we have a special class to float that sticky note left.</h2>
</div>
```

Float Left:

```
<div class="span3 alert-stick stick left-stick">
  <h1>Float Me Left</h1>
  <h2>Yep, we have a special class to float that sticky note left.</h2>
</div>
```

Float Me Left

Yep, we have a special class to float that sticky note left.

Nullam quis risus eget urna mollis ornare vel eu leo.

Float Me Right

Yep, we have a special class to float that sticky note right.

To insert a sticky note in a sidebar use the following markup...

bizstrap also includes a special class for inserting sticky note into right-side or left-side sidebars. To insert a sticky note into a sidebar use the following markup:

```
<div class="attention-sidestick sidebar-stick">
  <h3>Sticky Notes for Sidebars</h3>
  <p>Slap that sidebar with an attention grabbing sticky note.</p>
</div>
```

- > [Tables](#)
- > [Tabs and Collapses](#)
- > [Typography](#)

Sticky Notes for Sidebars

Slap that sidebar with an attention grabbing sticky note.

Style them

You can even

Examples of sticky notes

For several examples of sticky notes refer to the “**stickies.html**” file in your bizstrap download files.

Dividers

bizstrap include six (6) customer line dividers. Here is the markup for bizstrap’s line dividers:

```
<div class="text-divider1"></div>
```

```
<a class="text-divider2" href="#top">back to top</a>
```

[back to top](#top)

```
<div class="text-divider3"></div>
```

```
<a class="text-divider4" href="#top">back to top</a>
```

[back to top](#top)

```
<div class="text-divider5">
```

```
<div class="text-divider6">
```

Frames

Most of the image frames listed below are included with the Twitter Bootstrap framework. However, we've documented them here because bizstrap includes one addition class for image frame that you won't find in the Bootstrap Framework: the rounded image border (class="bordered-img").

For image frames in bizstrap simply add classes to an element to easily style images in any project. Below are the image frame options available:

Apply Rounded Corners to an Image

```

```

Place Image in a Circle

```

```

Apply Squared Image Border

```

```

Apply Rounded Image Border

```

```

Icons

bizstrap does not utilize the Glypicon icon library included with the Twitter Bootstrap Framework. Instead, it utilizes Font Awesome, which includes more icons and feature flexibility as far as icons are concerned. Font Awesome is fully documented ; and you can find a full list of Font Awesome icons and icon functionality at <http://fortawesome.github.com/Font-Awesome/>.

Font Awesome

The iconic font designed for use with

Price Tables

Bootstrap includes custom 4-column, 3-column, and 2-column price tables. Below is the markup for Bootstrap Price Tables for a 2-column price table:

The diagram illustrates a 2-column price table structure. A red bracket labeled "Price Table Class" spans the entire row of divs. Another red bracket labeled "table3" = 2-Column Price Table" spans the first two columns of the row. A blue box labeled "Column Title" covers the title and cost sections of the first column. A blue box labeled "Price Row for Column 1" covers the list items under the first column's title. A blue box labeled "Item List" covers the list items under the second column's title. A red bracket labeled "Column 1 Button Link and Text" covers the "Read More" button under the first column's title. A red bracket labeled "Highlighted Column" covers the third column of the table, which contains the "Free" and "Premium" plan details.

```
<div class="row show-grid price-table-object">
  <div class="dif-table price-table3">
    <div class="span2 table-column first-column">
      <p class="title">Free</p>
      <p class="cost">$0 / year</p>
      <ul>
        <li>List item 01</li>
        <li>List item 02</li>
        <li>List item 03</li>
      </ul>
      <p class="bottom">
        <a class="btn" href="#">Read More</a>
      </p>
    </div>
    <div class="span3 table-column">
      <p class="title">Premium</p>
      <p class="cost">$0 / year</p>
      <ul>
        <li>List item 01</li>
        <li>List item 02</li>
        <li>List item 03</li>
      </ul>
      <p class="bottom">
        <a class="btn btn-primary" href="#">Read More</a>
      </p>
    </div>
  </div>
</div>
```

For 3-column and 4-column price tables simply change the dif-table class from "price-table3" to "price-table2" (for 3-column price table) or "price-table1" (for 4-column price table).

4 Column Price Table <div class= "dif-table price-table1">

Free	Standard	Premium	Deluxe
\$0 / year	\$0 / year	\$0 / year	\$0 / year
✓ List item 01			
✓ List item 02			
✓ List item 03			
Read More	Read More	Read More	Read More

3 Column Price Table <div class= "dif-table price-table2">

Free	Premium	Deluxe
\$0 / year	\$0 / year	\$0 / year
✓ List item 01	✓ List item 01	✓ List item 01
✓ List item 02	✓ List item 02	✓ List item 02
✓ List item 03	✓ List item 03	✓ List item 03
Read More	Read More	Read More

2 Column Price Table <div class= "dif-table price-table3">

Free	Premium
\$0 / year	\$0 / year
✓ List item 01	✓ List item 01
✓ List item 02	✓ List item 02
✓ List item 03	✓ List item 03
Read More	Read More

Quotes

Floating left blockquote

```
<blockquote class="quote-left"><p>Quote text goes here.</p></blockquote>
```

*Fusce condimentum eleifend enim a feugiat.
Pellentesque viverra vehicula sem ut
volutpat.*

ac, vestibulum at eros. Maecenas sed diam eget risus varius blandit sit amet non magna. Donec id elit non mi porta gravida at eget metus. Praesent commodo cursus magna, vel scelerisque nisl consectetur et.

Standard blockquote

```
<blockquote><p>Quote text goes here.</p></blockquote>
```

Fusce condimentum eleifend enim a feugiat. Pellentesque viverra vehicula sem ut volutpat.

Standard blockquote with author

```
<blockquote><p>Fusce condimentum eleifend enim a feugiat. Pellentesque viverra vehicula sem ut volutpat. <p  
class="autor">Mr.Sam , Manager</p></blockquote>
```

Fusce condimentum eleifend enim a feugiat. Pellentesque viverra vehicula sem ut volutpat.

Mr.Sam , Manager

Floating right blockquote

```
<blockquote class="quote-right"><p>Quote text goes here.</p></blockquote>
```

Aenean lacinia bibendum nulla sed consectetur. Nullam quis risus eget urna mollis ornare vel eu leo. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Integer posuere erat a ante venenatis dapibus posuere velit aliquet. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

*Fusce condimentum eleifend enim a feugiat.
Pellentesque viverra vehicula sem ut
volutpat.*

Large Quote

```

<blockquote class="large-quote">

    <span class="figure-left"></span>

    <p></p>

    <p class="autor">Mr.Sam , Manager</p>

    <span class="figure-right"></span>

</blockquote>

```

Sliders and Videos

Inserting a Slider Revolution Slideshow

The basic markup for inserting a Slider Revolution slideshow is as follows:

```

<div class="bannercontainer" >
    <div class="banner" >
        <ul>
            <li>Slide 1</li>
            <li>Slide 2</li>
            <li>Slide 3</li>
            <li>Slide 4</li>
            <li>Slide 5</li>
        <ul>
    </div>
</div>

```

Refer to Slider Revolution documentation above in the **Home Page: Slider** topic.

Finally, the following markup must be contained anywhere in the page body, preferably just below the footer:

```
<script type="text/javascript" src="js/revolution.custom.js"></script>
```

Inserting a Flexslider Slider Slideshow

The basic markup for inserting a Flexslider slideshow is as follows:

```
<div class="flexslider slider1">
    <ul class="slides">
        <li class="slide1">
        <li class="slide2">
        <li class="slide3">
        <li class="slide4">
    </ul>
</div>
```

Refer to Flexslider documentation [here](#).

Finally, the following markup must be contained anywhere in the page body, preferably just below the footer(this will help to increase the speed in which your pages will load):

```
<script type="text/javascript" src="js/custom.js"></script>
```

Inserting YouTube Videos

To insert a YouTube video into a bizstrap page you the following markup:

```
<iframe width="100%" height="435" src="http://www.youtube.com/embed/ceeV2lrqonQ" frameborder="0"
allowfullscreen></iframe>
```

Inserting Vimeo Videos

To insert a YouTube video into a bizstrap page you the following markup:

```
<iframe src="http://player.vimeo.com/video/36768371?byline=0&portrait=0" width="100%" height="525"
frameborder="0" webkitAllowFullScreen mozallowfullscreen allowFullScreen></iframe>
```
